

PATENT

**THERAPEUTIC USE OF ACYLGLYCEROLS AND THE NITROGEN- AND
SULFUR-CONTAINING ANALOGUES THEREOF**

GENFIT SA

ABSTRACT

The invention relates to the use of acylglycerols and the nitrogen- and sulfur-containing analogues thereof in therapy, particularly for the treatment of cerebral ischemia. The invention further relates to methods for preparing said derivatives, novel compounds, in particular acylglycerols, the nitrogen- and sulfur-containing analogues thereof and methods for preparing same.
